Completed	Saturday, 10 October 2026, 1:45 PM
Duration	5 mins 23 secs
Grade	**15.00** out of 15.00 (**100**%)

Question **1**

Correct

Mark 1.00 out of 1.00

In binary search, how is the middle element determined?

a. By starting from the first element
b. By comparing each element sequentially
c. By dividing the list length by two ✓
d. By using a hash function

Question **2**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

a. Number values should only be present

Number values should only be present

b. There should be direct access to the middle element in any sublist
c. There must be a mechanism to delete and/or insert elements in the list ✓
d. The list must be sorted

Question **3**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Checking each element sequentially ✓
b. Sorting the list before searching
c. Skipping every second element
d. Dividing the list in half repeatedly

Question **4**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

a. When the list contains duplicate elements
b. When the list is sorted ✓
c. When the list is unsorted
d. When the list is very small

Question **5**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Linear search
b. Hash search
c. Binary search ✓
d. Sequential search

Question **6**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

a. By dividing the list into halves
b. By sorting the list first
c. By comparing each element in the list sequentially ✓
d. By using a hash function

Question **7**

Correct

Mark 1.00 out of 1.00

What happens in a binary search if the list has an even number of elements?

a. The higher middle element is chosen as the middle element ✓
b. The lower middle element is chosen as the middle element
c. The middle element is chosen randomly
d. The search stops

Question **8**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

a. Dynamic search
b. Linear search ✓
c. Hashing
d. Binary search

Question **9**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

a. Bubble search
b. Quick search
c. Merge search
d. Linear search ✓

Question **10**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. The first element is returned
b. The search is considered unsuccessful ✓
c. An error is raised
d. The last element is returned

Question **11**

Correct

Mark 1.00 out of 1.00

Which of the following statements about linear search is true?

a. Linear search can be applied to both sorted and unsorted lists. ✓
b. Linear search divides the list into halves.
c. Linear search requires the list to be sorted.
d. Linear search is more efficient than binary search on large lists.

Question **12**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the middle of the list
b. In the right sublist ✓
c. At the beginning of the list
d. In the left sublist

Question **13**

Correct

Mark 1.00 out of 1.00

What is the advantage of binary search over linear search?

a. Binary search works on unsorted lists
b. Binary search can find multiple instances of the target element
c. Binary search does not require dividing the list
d. Binary search has a lower time complexity on large, sorted lists ✓

Question **14**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

a. The search starts over from the beginning
b. The search continues until the end of the list
c. The search backtracks to find duplicate elements
d. The search stops immediately ✓

Question **15**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Deleting elements from a list
b. Sorting elements in a list
c. Determining whether an element is present in a list ✓
d. Inserting elements into a list
